### President's Report

I want to wish all our Club members, near and far, a very happy New Year and trust that the preceding week's festivities and aftermath have in no way diminished the possibility of that occurring!

On New Year's Day I was thinking about the things we wish each other at this time of year. Things like a "Merry Christmas", "Happy, prosperous and healthy New Year" etc. . We very easily and glibly say these things to each other, but it is quite likely that we give little if any thought to these possibilities actually happening in the life of the recipient of our greeting. For example, a divided family or a family who has just suffered traumatic loss might have considerable difficulty experiencing any great "merriment" over Christmas and a person suffering a terminal illness is not going to be particularly encouraged by wishing them a "prosperous and healthy" New Year.

My thoughts along these lines were no doubt influenced by the death of a good friend just a day short of the New Year. The previous two weeks had been taken up with the difficult task of farewelling family members and friends and one would have thought there was little possibility of merriment over Christmas and certainly no chance of looking forward to a "Happy

New Year". And yet, in spite of the circumstances, there was considerable joy and thankfulness in that family since they had a confident assurance in what lay ahead, an assurance that was in no way tied to the uncertainties or unknowables of the coming year. Sure, there was the grief and sorrow of separation but not the hopelessness of "those who have no hope." By contrast, I can never forget witnessing many local funerals among our very primitive locals in Papua New Guinea when the cacophony of wailing could be heard for miles. For many of them, there was "no hope". "Hope" in this context is not "wishful thinking" but "confident expectation!" There's a huge difference.

We live in uncertainty – that's life. Despite all the prognostications and predictions about what might lie ahead, no one has ever been able to say with certainty what the next hour will bring, let alone the next year. I discovered a long time ago that if my "merriment" and "happiness" were going to be tied to the vagaries and uncertainties of an unknowable future, I was going to be sadly disappointed. A bit like pinning all my hopes for

### *(Presidents' Report Cont'd)*

good DX on ionospheric prediction charts which, while vastly better than many of our other so-called predictions, still fall way short of 100% certainty.

As was said years ago "I may not know what the future holds but I know the One Who holds the future!" That's the sort of assurance I want and that's the sort of 2007 I wish for you! Not the wishful, wistful hope that it just might pan out all right – perhaps.

**Alan VK2GD**  
**El Presidente**

## San Crox Christmas Bash

2006 was probably one of the most eventful years for the club during the last couple of decades. As well as celebrating the 35th Anniversary of the formation of ORARC with a special function at the Marian Centre in October, our members provided communications facilities for two car rallies, along with our usual participation in the Beechwood Billy Cart Classic communications arrangements and our continued involvement in the regular popular amateur field day events, and JOTA. The 100th edition of **OXTALES** hit the streets, and the introduction of regular weekly sessions of a much appreciated Working Bee, saw the club's repeater facilities enjoy a significant "shot-in-the-arm" from this dedicated group's productive efforts. (See picture below - Right- VK2ZHE with the rack for VK2RPM on show at the event)

A wind up of this eventful year's events took place on Saturday, 2nd December 2006, when some twenty-seven members and their XYL's, friends, and two "harmonics", fronted up at the San Crox Recreation Centre to join in our annual Christmas BBQ/Picnic. It was pleasing to see the younger generation represented to give a really authentic family atmosphere to the event. A big welcome to Adeania and Andrew, daughter and son of Steve VK2MDX and XYL. We hope Santa was kind to you both! This event marked the final gathering of the club for 2006. It included the December monthly meeting,

conducted at the venue following the BBQ lunch.

The weather was kind, warm & friendly, in a lush, green and well manicured venue.

The ritual of passing on the "The Stirrer's Helmet" was conducted with the usual aplomb, pomp and circumstance by Bruce, VK2HOT, the 2006 holder. The new deserving recipient of this ten-years-old prestigious artefact was John, VK2CIF. Congratulations John! You can now wear this unique decorative

head-dress with pride. You must now consider the candidates for next year's presentation and ensure that only the most deserving member gets to take it on board for the duration of 2007.

Despite some shortcomings related to the normally satisfactory BBQ facilities at the venue, the willing cooks produced an admirable result that satisfied the hunger of the attendees.

The club's 2007 pictorial Calendar was ready for distribution by sale to those attending, and sales were very encouraging.

(There are still copies available from the Treasurer or Secretary at a cost of \$5 each should members wish to secure one to keep track of the club's programme for 2007. The quality of the paper, and the colour of the pictures are both significantly better than our first attempt for the 2005 year.)

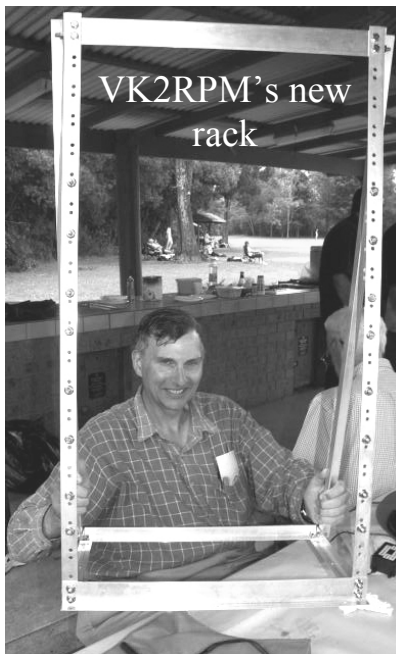

Lots of pic-

**Above:** Tooling up for the big "Cook-up".

**Left:** All intent upon the Meeting proceedings.

tures were taken by the growing group of digital camera owners. A sample of the shots taken are included in the following columns of this. Thanks to all the contributors. Space did not allow inclusion of all pictures that were taken.

**The Venue at San Crox Recreation Area**

**Left: The “Chefs” giving the snags a workover. Bill VK2ZCV, Chas VK2FSH, and Steve VK2DMX— Congratulations on the acquisition of the Advanced licence and the new call sign, Steve. (Who are the guys hiding behind ZCV’s left shoulder and DMX’s left shoulder?)**

## Technology Marches On?

John, VK2KCE, writes :-  
Came across this gem of an ad  
via Ebay!

*IC-100 41" Magnetic Mount Antenna  
IC100 NEW, SEALED IN BLISTER  
PACK! Longer Whip than most magnet  
mount antennas means it will get out fu-  
ther!!!! this antenna gets out!!*

I thought that the length of the whip  
determined the resonant frequency!!!!

The spelling mistake is theirs too!!

73 de VK2KCE

## Another Interesting Programme

(Contributed by Jim, VK2VIV)

Hi

Just to let everyone know of a new  
computer program for amateur radio.

It is called QSONet and is like Echo-  
link without all the hassles of opening ports  
of the computer router to access. It is an  
animated radio transceiver on you com-  
puter that operates just like a normal radio  
without the RF. Ideal if you are in a hous-  
ing situation where you can't put up anten-  
nas or cause RF interference.

You need to register before November  
1st to be eligible for the 90 days free trial.  
Even though it will cost after that I think it  
will be a big hit and can only get better.

Try it. Only for Hams.

[www.qsonet.com](http://www.qsonet.com)

(you will need to send a photo or email  
copy of your Ham Radio licence when reg-  
istering)

- Jim Neil VK2VIV

## A Pleasing Response

I was chasing a Ranger DX5054 100-  
watt all mode 6m transceiver, and there  
have been a few sold on Ebay for very in-  
flated prices. Ranger Communications in  
the US sold out their remaining stock for  
\$US369.00 (\$Aust470.00). The one I found  
on Ebay sold for \$Aust570.000!

In my quest to find one, I emailed  
Ranger Comms in USA to see if anyone of  
their distributors had one, but nothing was  
available.

Out of the blue this email turned up:

BACK BY POPULAR DEMAND!!!!!!  
RCI-5054DX-100 6 METER TRANSCEIVER

Recently, we received an e-mail from you  
about interest in purchasing our RCI-5054DX-  
100 6 Meter, 100 Watt all mode radio. At that  
time we had planned to discontinue that  
model as interest seemed sporadic.

Due to recent overwhelming response,  
we have decided to put this radio back in pro-  
duction and will have them available around  
late March. We are unhappy about the long  
lead time, but it is beyond our control due to  
component delivery times.

If you are still interested in purchasing  
this radio, it would be best to pre-order as  
there appears to be pent up demand for it.  
Once available, we will ship to you without  
delay. The cost will still be at the very attrac-  
tive price of \$Aust445.00 or \$US349.00 plus  
shipping.

Please also let other 6 Meter fans know  
about this as continued production is always  
related to interest. Our plan is to continue this  
model as long as there is interest from the 6  
Meter world.

If you would like more information on  
this radio prior to your purchase, Service  
Manuals are available for \$10.00. User Manu-  
als are free of charge.

For ordering radios or manuals, please  
contact us at 800-668-6314 or

[sales@rangerusa.com](mailto:sales@rangerusa.com)

Thanks, from the crew at Ranger.

Just a bit of news along with the back-  
ground information for the members.

Regards, John (VK2KCE)

**Coffs Harbour & Districts Amateur Radio Club Field Day**

**Sunday, 21st January 2007**

**Time 8.30am to 3.30pm**

**On Rain, Hail or Shine**

**NEW LOCATION, NEW DISPLAYS, NEW EVENTS**

## VK2RPM Repeater Upgraded for Christmas 2006

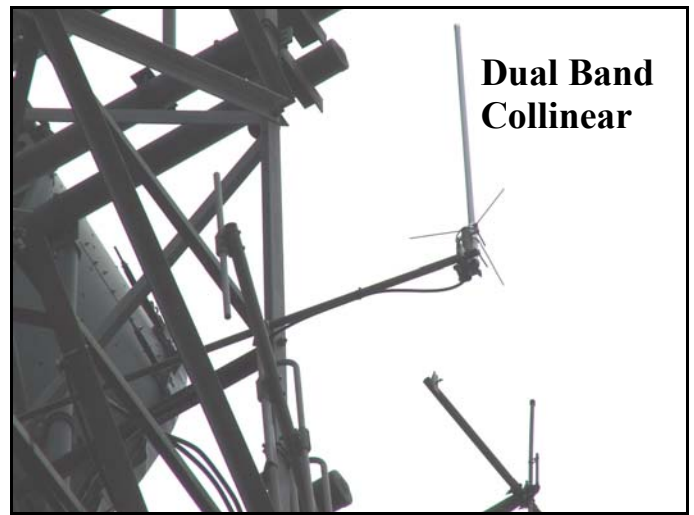

The Middle Brother Mountain repeater site received some intensive attention in the two weeks before Christmas. The VK2RPM 2 metre 146.7 MHz VHF FM repeater was replaced with completely new equipment and the 70 centimetre UHF FM repeater service was restored with a new repeater operating on 438.425 MHz. A new dual band vertical collinear antenna at a height of approximately 30 metres with a clear view to both the north and the south is connected to the 70 centimetre repeater transmitter and receiver via a duplexer and is also connected to the 2 metre repeater receiver via a VHF/UHF duplexer. The 2 metre transmit antenna has been re-mounted further out from the tower on new hardware.

**VK2EI  
Neil  
Hard at it!**

The installation of the two new repeaters and the aerial works are the result of many hours of work throughout the year by a dedicated band of volunteers under the guidance of Repeater Chairman Bill Brooke VK2ZCW. It has been a real team effort. Most of the preparatory work was carried out during the regular Wednesday morning working bees in VK2ZHE's shed, but several members also completed various key tasks at their homes.

The new repeater transmitters and receivers had to be brought up to specification, modified and tuned to the club's frequencies. As well, the new repeater controllers had to be constructed which required production of circuit boards from scratch, sourcing all the components, obtaining and programming the EPROMs, building the boards and finally testing them. The new repeaters were then assembled into a custom built aluminium rack frame and double screened coaxial cables made up for all the RF interconnections.

**Dual Band  
Collinear**

Finally the complete repeaters were soak tested into dummy loads in the workshop prior to being transported to the repeater site. The new dual band aerial and VHF/UHF duplexer was also workshop tested.

John VK2KHB has kindly built and donated a steel rack frame which will be used to test and store the spare repeater transmitters and receivers. Thanks John.

Working bees at the Middle Brother Mountain repeater site were held on Thursday 14<sup>th</sup> and Thursday 21<sup>st</sup> December in order to undertake the antenna work on the tower, and to install the new repeater equipment. Special thanks must go to Don McLean, who loaned his brother John VK2KCE his Diesel/gas powered Nissan Patrol four wheel drive station wagon (a most impressive vehicle) for the two trips to the mountain. This enabled the five participants in the two working bees to travel to the site in one vehicle together with all the tools and equipment. Thanks Don.

During the two on site working bees Neil VK2EI and Steve VK2DMX carried out the antenna work and John VK2KCE, Bill VK2ZCW and Henry VK2ZHE were the ground crew. Special thanks are due to Bill VK2ZCW and John VK2KCE for providing the antenna mounting hardware. Thanks also to Bill VK2ZCV, Jim VK2BZD and Graeme VK2ZIS who patiently checked out the performance of the new aerial and the two new repeaters from their home stations during the site works.

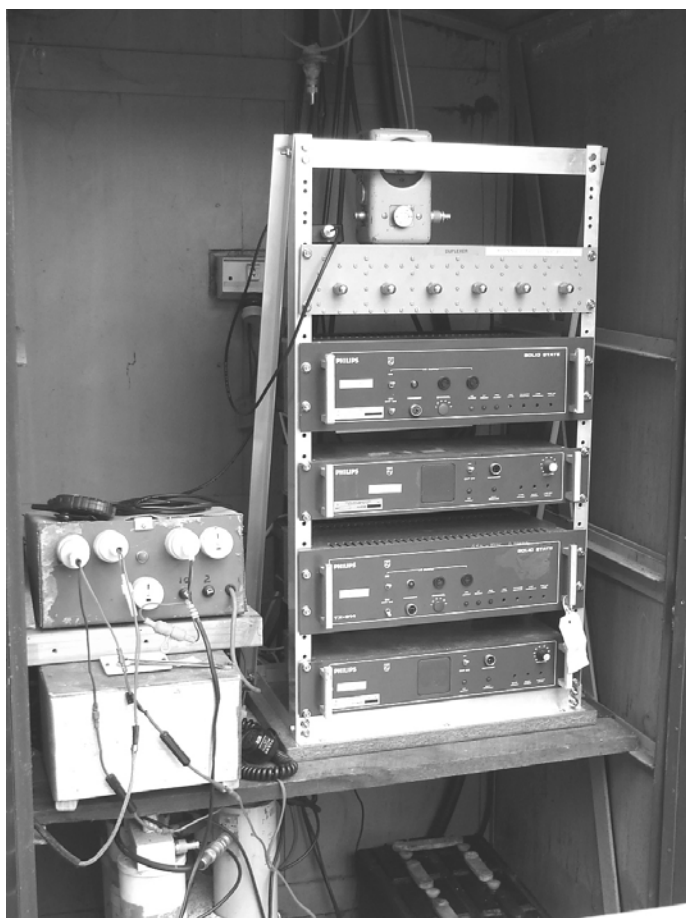

Thank you to everyone who has contributed to the project so far including Bill VK2ZCW, Bill VK2ZCV, Arthur VK2ATM, Jim VK2VIV, Neil VK2EI, Craig VK2ZCM, Bob VK2XIQ, John VK2KCE, John VK2KHB, Steve VK2DMX, Bruce VK2HOT, Alan VK2GD, Jim VK2BZD, Trevor VK2TT, John VK2AYQ, Graeme VK2ZIS, Barry VK2FBRG and Henry VK2ZHE. Sincere apologies to anyone who has been inadvertently omitted from the list.

Special thanks are due to Trevor VK2TT for his assistance in fine tuning the keying characteristics of the Morse Code idents.

The Wednesday working bees are indebted to Wendy Monck, Corrine McLean and Carol Neil for providing the delicious morning teas which have sustained the workers in their toil throughout the year. The continuing high participation in the working bees is due in no small part to the attraction of the morning teas. A sincere thank you, ladies.

The Wednesday morning working bees will continue in 2007 as the Telegraph Point VK2RCN UHF repeater and the spare VHF and UHF transmitters and receivers are still being worked on. New VHF and UHF duplexers are planned. A UHF antenna still has to be installed at Telegraph Point for the VK2RCN 70 centimetre repeater. Further site visits are still required to both Middle Brother Mountain and Telegraph Point in order to complete the outstanding work on both the FM voice and the digipeaters at the two sites.

If the VK2RPM 70 centimetre repeater remains free of interference at Middle Brother Mountain, application will be made to permanently swap the VK2RPM and VK2RCN UHF frequencies so that VK2RPM will remain on 438.425 MHz and VK2RCN will operate on 438.525 MHz.

### The Re-Vamped VK2RPM (2-M & 70cm)

This is the end result of the fine workmanship executed by the dedicated membership of the Working-Bee that has been active over many months of the now departed 2006. What's more, it works like a "well-oiled-machine". Well Done & Thanks to all from all the users and members.
