WYONG Hamfest

Once again this year's Wyong Hamfest went off well. It was a large turnout. As we drove into the grounds, it wasn't hard to find the place. All you had to do was follow the cars that looked like porcupines with all the antennas sticking out! Once

we got parked and started walking in you got the feeling that you were a kid again going to the Lolly store! It was hard to decide which way to go as there were so many tables set up with any kind of radio gear you could imagine. Also, there were heaps of Seminars.

and even

The Lolly Store!

Transmitter hunts. Good on you, Wyong. See you next year.

VK2IPO

VK2RPM Speaks Again

After being turned off on 28th October (in the last millennium), the repeaters on Middle Brother are

again operational.

There were turned off to enable tower upgrading works to be undertaken

by the site owners. Our antennae were required to be moved to allow access to

(Continued from page 1) particular locations of the tower structure. It was understood that the upgrading work would be of short duration and that our down-time would be only several days, or perhaps one

to two weeks at the most Things did not quite work out that way.

Although the tower works were completed reasonably quickly, we were unable to obtain firm indications as to where new dishes would be located by the owners, on the new tower extensions. Having recently received verbal indications as to where we could re-install our antennae arrays, we found it necessary to fabricate new mounting hardware to suit the changed locations, and to meet the owner's preferences for mounting arrangements. The major effort in constructing the new mounting hardware was undertaken by Will (VK2XXU). When the prefabrication was completed, under Will's truly professional hands in his home workshop, the hardware was hauled to the site on Will's trailer. The task of getting it all up the mast and the final assembly

thereon, was undertaken by a small team of volunteers comprising Neil (VK2EI), John (VK2JJ), Jim (VK2BZD), Will (VK2XXU) and Trevor (VK2TT). Two bites at the cherry

were necessary. The first

day's effort was

truncated by weather conditions and a minor hardware glitch that could not be fixed on site because of the fog and rain. However, the voice repeaters on 2-Metres and 70-centimetres were restored on that excursion which took place on Tuesday 4th April. During the following week, on Wednesday, 12th April, four of the above team returned to the scene of the crime and completed the work on the antennae for the packet Digipeaters, on the local VHF port and the Backbone UHF port. Through either "serendipitous" circumstances, or just plain old good technological practice that had been used in the equipment construction.

all repeaters, TNC's, and power arrangements fired up without drama or complaint after their prolonged "hibernation". The backbone digipeater became busy logging calls in its HEARD List within a few seconds of switching on, and contacts were made through the 2-Metre voice repeater immediately it was repowered. At the time of going to press, it can be reported that the ROSE Switch is functioning normally to both VK2RGL and VK2RCH ROSE Switches, and both voice repeaters (2-Metres and 70-cm) are functioning normally. Thanks to all who participated in getting this gear back on the air. That includes John (VK2VY) who rushed home from

73 de Trevor (VK2TT) Chairperson, Repeater Committee.

work and loaded up the

ROSE Switch.

Port Macquarie Field Day 2000

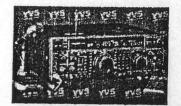

Alan Madigan reports that all is going well in preparation for the upcoming Field Day here in Port on June 10th and 11th. We will desperately need as many volenteers as we can get though. There are always little tasks to be

done, whether it be cook the snags, or help at the door with the admission fees etc. Even if you can only spare an hour of your time to help out this year that would be appreciated by all. Also, the request was made that if possible try to

have exact change, which is \$10.00 for the entry fee. That would be of great help in that it's always easy to run out of money for making change. Hope to see everyone at Field day this year!!

Field Day June 10-11

This month has been a real bonus to me, with the RPM Digipeater going back on-line, and with my purchase of the KAM dual port TNC. It has opened up a lot of possibilities of things that I can get going now. And, I have noticed that I am down at the radios a lot more

Editor's Corner

now after getting home from the "Salt Mines". I remember when packet first came along. It caught on like wild fire. Everyone ran out and bought themselves a TNC and jumped on the band wagon. Keyboard to keyboard qso's were readily available in those days. But then all the BBS's came along and took

over the frequencies. It got to the point that when you wanted to do a little node hopping and get to your friend down the radio pike, it was almost impossible do to the bbs traffic on the channel. People lost interest fast in packet due to that I believe. I don't think packet ever really got it's chance to become an icon in the ham

shack that would always keep ones interest It's personality was taken away when everybody started using the Robotic BBS's and unattended tnc's There is a need for the bbs stations I believe. And like everything else they have their place in Amateur radio. But, I think what we are mising these days with the

(Continued on page 5)

(Continued from page 4)
paketeeros is the lack of
1 on 1 keyboard chats.

Since I have the dualport TNC I would like to try and reestablish the interest of packet by setting up a VHF/HF gateway. It's actually already in place, but I am still looking for a good frequency on HF to let it sit on. Right now it's on 20 meters and available to use when I am at the radios. You can connect to my gateway via RPM and the port rose address. My gateway node to connect to is PRTMAC. My mailbox is VK2IPO-2, and my conference bridge & BBS is VK2IPO. When you connect to me if I am not at the keys you can type //help for a list of commands. When you do that you will see that there is a full CD of radio mods to download, and you can even get a copy of last month's Oxtales sent to you YAPP Protocol!! In the meantime I am considering putting up an antenna for 10 megs and

mayby stick my gateway on 10.149. I think that would be a daytime/ nightime band all around.

By the way if anyone out there is on packet and uses KaGold software please email me. I am looking for someone to get together with on the packet and send some ansi pictures with.

I recently met VK2TV over in Newcastle and here's a few excerpts of an email he sent me via packet radio.

I understand what you're saying about packet activity. It's a bit of a double edged sword with BBS's. Users want the mail but don't want all the traffic, and I completely understand how they feel. The problem really stems from the fact that our packet system never got out of the 80's. We still have (to a large extent) a common backbone frequency, complete with hidden transmitters, and we still have mail forwarding on

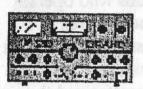

user ports. I know a number of sysops who would have provided all the equipment to put a bbs port in at their local node but for some reason the clubs who operate the nodes weren't interested. I guess I'm a bit lucky here being the bbs operator and the club's repeater officer. Also, we have a large percentage of packet operators in the club and they're content to go along with my recommendations I believe that if the network can be improved so that long distance keyboard to keyboard contacts are again possible, user will return to packet. We can never expect to compete with internet in terms of speed but I think we can make packet fast enough for it to be attractive and useful

So, keep these things in mind, guys. And give me a connect sometime and have a go at my gateway. I look forward to meeting all the packeteeros out there soon!!

Classifieds Ads

If ya got items for sale or trade let VK2IPO know.

Wanted: Would like to purchase a 20 amp or better 12 Volt Power Supply. Please respond to Alan Madigan VK2OA.

Wanted: Looking for a 2 metre yagi

of some sort. All responders reply to Larry, VK2IPO. Email: okie@mpx.com.au

Trade: I have a 3
Element Australian
made 20 metre
yagi that I would
like to trade for an

HF Amplifier. Will consider other items you have to trade as well. Respond to Larry, VK2IPO. Email: okie@mpx.com.au or call 65836.924

Wauchope Ham Classes

We would all like to recognize the wonderful job that Larry, VK2CL is doing teaching and getting the mates over there ready

for ham tickets and upgrades, etc. Well done, Larry!!

It looks as though there are 3 more blokes over there ready to take their regulations exam as well. So, good luck to Gary, Graham, and Craig. Soon they will have callsigns now. Good on yas!

Club BBQ at VK2ZCV

Is me snag done yet Bill?

This years
sausage sizzle will
be held at Bill's
home at: 35
Wayfield Way,
here in Port

Macquarie, at 10 am Sunday morning, (30-4-2000). I don't know about you, but I can smell

those bangers cooking already! And I have been looking for an excuse to cop a free meal anyway!
