GENERAL MEETING

1300 Hrs (1 pm) SATURDAY

MARCH 6

FOLLOWED BY A

B.B.Q. AT

SHELLEY BEACH AT 1600 Hrs

The next GENERAL MEETING will be held at the S.E.S. building at 1 pm next Saturday, March 6. This will be followed by a family BBQ at Shelley Beech at 4 pm.

Ian, VK2XU, will be giving a demonstration of the new Kenwood TS 50 Transceiver immediately following the business part of the G.M..

If you can't attend the G.M. then why not bring your spouse and family to the BBQ. There are open BBQ's at the Beach and these will be hot and ready for use, so bring your best bangers, steak, onions, etc. Naturally the BBQ will be subject to the weather, only RAIN will stop play.

Whilst the men are nattering over the G.M. the out-of-town ladies are invited to spend the afternoon up until 3.30, with Pat Edmondson XYL of Charles VK2FSH. The address is Lot 7 Willow Crescent, PMQ., which is the last turning off to the left going out of PMQ on the Hastings River Drive.

The Annual General Meeting

For those of you that were unable to attend the AGM the following officers were elected to the Executive Committee.

President: Tracy Dignum VK2GTM

Vice President: Charles Edmondson VK2FSH

Secretary: Will Jamieson VK2XXU

Treasurer: Kevin Coulter VK2MAM

New Classes for the Novice licence commenced in February.

The Field Day this year will be held at the Wauchope Show Ground over the Queens birthday in June. Volunteers are needed to ensure this is as successful as previous Field Days.

ON AIR MEETINGS

Don't forget, every Wednesday evening at 20.00 (8pm), there is a net on 3597.5 SSB. Lets have more participants please. With over 60 members in the Oxley district, its distressing to see only 3 or 4 stations join the net. Its a little late at night for some of you, but surely the younger members can stay up for a while to say hello.

REPEATERS

As well as a VHF and UHF FM repeater, we now have a Digipeater on 145.875 MHz active from Middle Brother Mountain. Now you have a gateway North, South and West. The VK2ATM-1 BBS has been updated and if you have packet it is suggested you check there for your mail and information on ORARC news.
